Summary

Web designer and creator with one year of experience of building business web pages and launching them. As a "Full Stack" developer I am able to do everything from design a aesthetic website, create the pages, and handle back end data analysis.

Skills

- Full stack developer, knowledge of HTML, CSS, JavaScript, and PHP allows complete front-end and back-end development work.
- Highly productive and always searching for ways to increase productivity.
- Able to recognize good design and bad design, with code and aesthetics, and able to correct them easily.
- Always looking for cost effective solutions to expensive problems. Goal is always Maximum efficiency for minimum cost

Software/Programming Languages

- HTML
- CSS
- JavaScript
- C++

- Adobe Photoshop
- Google Sketchup
- Microsoft Office

Education

Medina High school	Sept 2009 - June 2013
